District-Provided Student Mobile Device Policy, Procedures and Information Handbook Grades K - 5

2018-2019

Introduction

As part of our district technology plan, every Kindergarten and 1st grade student and teacher will be provided with an iPad and every 2nd through 5th grade student and teacher will be provided with a Chromebook by the Edison Public School District. Teachers and students are permitted to use the device outside of the school building. Elementary classrooms have transformed into 1 - to - 1 environments, which support an equitable distribution of technology and ubiquitous access. In 1-to-1 classrooms the integration of technology is both intentional and spontaneously driven by personal inquiry. Technology ceases to be a scheduled event, freeing teacher and students to collaborate and create in real-time. The district's 1-to-1 initiative has created model 21st learning environments that have transformed the teaching and learning process for all students in the District to a more student-centered, teacher-facilitated experience that leads to higher levels of engagement, empowerment and ultimately, academic achievement.

This will be accomplished by providing technology-rich 21st Century classroom environments and curriculum-aligned resources, a state-of-the-art network infrastructure, and on-going, high quality professional development to all Edison teachers and administrators to enable them to lead and teach in these environments.

As a result, students will be empowered to assume responsibility for their learning by applying new and existing technologies to solve real world problems while simultaneously expanding their global and cultural awareness and developing essential skills necessary for college- and career-readiness.

Students are responsible to bring their device to all classes, unless specifically instructed not to do so by their teacher.

3.1 Devices Left at Home

If a student leaves their device at home, they are responsible for getting the course work completed as if they had their device present.

3.2 Device Undergoing Repair

Depending on availability, loaner devices may be issued to students when they leave their device for repair. Due to the limited quantity of loaners, they will be assigned on a first-come, first-serve basis. Therefore, please make sure to report any issues immediately.

Periodic checks of devices will be conducted to ensure that students have not removed required apps/settings.

5.2 Additional Software

The District's technology department will manage the applications on all student devices. All apps will be distributed through a secure distribution/management application that will act as a bridge between the devices and their respective App Stores. Students will be able to download any provisioned apps in this manner directly onto their device.
